

03/09/2002

ABOUT ME

My approach is focused on my professional and personal development, applying all the knowledge I have acquired. I possess skills to identify and analyze problems effectively, as well as to identify their possible causes. In addition, I have the ability to adapt to changing environments and successfully face the challenges that arise.

TECHNOLOGIES

- JAVA Y JAVASWING
- PYTHON
- JAVASCRIPT
- Node.js
- PLSQL Y SQL
- HTML5/CSS
- GIT
- Firebase
- APIS creation and management

PROJECTS

Among my most notable personal projects are the following:

TFG (Lazarus Rebirth):

It consisted of the development of an interactive page with templates, the implementation of an API in charge of managing the application's data, and the creation of a real-time database using Firebase and Python.

HOPS:

I participated in the creation and development of the BackEnd of the application, which aims to connect teachers and students in an interactive and simple way.

Alberto Lázaro Belinchón

Software Developer
